

# INVOICE

**To:** The Leadership Team, CONCES

**From:** Vandu Linus Daniel

**Date:** 5 June 2025

**Subject:** Development of CONCES Website (MVP)

**Total Amount:** ₦440,000

**Payment Terms:** 60% at project start, 40% upon completion

## Project Purpose and Understanding

Dear CONCES Team,

Grace and peace in the name of our Lord Jesus Christ.

As a fellow member of CONCES, I consider it a privilege to be entrusted with the responsibility of building the CONCES website. I see this not just as a technical assignment but as a ministry—a tool to connect, grow, and strengthen the body of Christ within the engineering community.

The vision for this project is rooted in service, fellowship, and excellence: creating a platform that reflects our identity in Christ, promotes knowledge, and builds meaningful bridges between students and alumni.

## Scope of Work (No CMS Used)

This project will be developed entirely from the ground up without relying on a CMS like WordPress. Every feature will be custom-built to meet CONCES' unique mission.

- **Frontend:** Built using Next.js for speed, scalability, and a great user experience.
- **Backend:** Node.js (with Express) and MongoDB for performance, security, and future scalability.
- **Christian Focus:** Devotionals, prayer requests, and spiritual content integrated alongside professional growth features.

## Website Features

### 1. Core Pages

- Homepage: Vision, mission, and latest updates
- About Us: Purpose, team, and CONCES story
- Blog/Devotionals: Faith-based content
- Contact Form
- Resources: Notes, e-books, uploads

## **2. Member Engagement**

- Member profiles, spotlight features
- Forum/discussion board
- Submission forms (prayer, mentorship)

## **3. Alumni Section**

- Private alumni access
- Events, lectures, job boards

## **4. Innovation & Competitions**

- Hackathon info, submission, leaderboards

## **5. Technical Qualities**

- Mobile-friendly and fast
- Secure login
- SEO-optimized layout

## **Project Fee Explanation**

I had the privilege of knowing Brother Joel personally—he was my branch president and a great inspiration. It was through his leadership that I joined CONCES and embraced the faith.

This is more than a project to me—it's a service to the fellowship that shaped me spiritually and professionally.

**Total: ₦440,000**

As a fellow member, I've offered a discounted price. A project of this scope, built entirely from scratch without CMS, would typically cost more.

This fee includes:

- Custom frontend and backend development
- Hosting integration
- Testing and deployment
- Minor updates post-launch
- Lifetime access to full source code

## Final Note

This website is more than lines of code — it's a digital altar. A place for Christian engineers to grow in faith, excellence, and community.

I am committed to delivering it with diligence, professionalism, and a heart for ministry.

Thank you for the trust.
